

The Back-To-School Code-A-Thon

January 26-28, 2018

The Back to School Code-A-Thon is a FREE 48 hour program that gives students an opportunity to use technology, research, and collaborate to address issues and problems confronting the human race on a global scale. Students will work together to learn to code HTML, CSS, and JavaScript while learning to use tools like GitHub to build a website that reflects their ideas and commitment to problem-solving. Prizes are available for the teams that create the top three projects in their location! This is an international event, and students will be able to speak, work, and learn with other students around the world via live video, web, and telecommunication technology!

- Learn web development in a collaborative environment
- Meet students from around the world
- Get international visibility
- Find solutions to real global problems using technology

Locations Include:

New York: LaunchPad, Westbury, NY
Pennsylvania: Penn Wood Middle School, Darby
Ohio: Sandusky County, Neeley Center
North Carolina: Charlotte. TBD
Australia: Perth, TBD

Open to ALL STUDENTS in grades 9 through 12 residing in the William Penn School District. Whether you're a novice or expert programmer, or just want to build your own website or application, this event is for you! All skill sets are welcomed.

To register go to our website or scan the code at right:
<http://we-connect-the-dots.org/register-for-codeathon-2018>

Registration and \$20 fee due December 15, 2017.

Space is limited! Register today!

Registered attendees are required to attend a pre-event meeting at a date to be announced.

This event is made possible by WE CONNECT THE DOTS, the PENN WOOD FOUNDATION, and the WILLIAM PENN SCHOOL DISTRICT.
